## --Foot Print Penguin--

Penguins make a cute craft, especially in the winter because they usually live in snowy regions. Creating a footprint penguin is a super easy craft for you and your kids.

### **Supply List:**

- Construction paper (light colors work best)
- Black and white paint
- Paintbrush
- Black and orange markers

**Step 1:** Paint your child's foot black with a paint brush or spread some paint on newspaper and have them step in it.

**Step 2:** Stamp a footprint on the construction paper. The toes will be the bottom of the penguin and the heel is the head.

**Step 3:** When the black paint has dried, paint the inner area white.

**Step 4:** Once the white paint has dried, use markers to draw eyes and a beak. You can also add wings and other details
